We are looking for the Smartest Developers on the block…

We at iRage are an agile, young bunch. You will get to solve some extremely challenging engineering problems and shape the future of the fast paced Algo-Trading industry while working alongside other exceptional programmers, quants and traders.

Role Summary - Software Developer

A Software Developer at iRage apart from being passionate about coding should be a rock-star programmer who is driven to stay ahead in the competition and loves to work in a fast-paced environment.

Apart from building new strategies, you will be involved in improving the efficiency of deployed strategies, as well as enhancing trading tools and trading platforms.

Required Skillset

- ✓ Strong C++ skills with a good experience of C++11 and C++14.
- ✓ Adept problem-solving skills, data-structures and algorithms.
- ✓ Strong understanding of computer architecture and multi-core architecture.
- ✓ Comfortable with working on Linux.
- ✓ Understanding of networks and network programming.
- ✓ Good knowledge in scripting language like Python.

Desired Skills

- ✓ Understanding of multi-threaded programming.
- ✓ Network and socket programming knowledge.
- ✓ Experience with inter process communication.
- ✓ Ability to work as an individual contributor as well as a team player.
